

# **Web Application Development Lab**

## **Assignment – 3**

### **Bootstrap 5**

1. Use HTML and Bootstrap 5 to perform the following task –
  - a. Write “Bootstrap: A CSS framework” in any heading tag. Change the font size, text color, background color and align the text to the center using Bootstrap classes.
  - b. Write a paragraph about Bootstrap. Combine bootstrap classes and custom CSS to justify the text, increase the font size, change the text color, and change the line height.
  - c. Create a blue colored button for “Read More” using bootstrap classes. Align the button to the right of the page.
  - d. Visit this page - [https://en.wikipedia.org/wiki/Bootstrap\\_\(front-end\\_framework\)](https://en.wikipedia.org/wiki/Bootstrap_(front-end_framework)). Create a table with information like – bootstrap version, release date, and major features (use an unordered list). Make the table width 50% and center align the table. Style the table using Bootstrap.
  - e. Design a section with 3 blog cards with blog images, text, and a read more button. Use a bootstrap grid system to make the design mobile responsive.
  - f. Design a signup form with the fields – name, gender, DOB, address mobile, email, and password. Style the form using Bootstrap 5. Then Centre align the form using the bootstrap card and grid system.
2. Design the given template using HTML, CSS, and Bootstrap 5.
